

Recent S4 exposure and recoverability

30-day recovery to S1/S2 after an S4 session

OBSERVED RECOVERY BY DENSITY BIN

33.4%

Density 0.00–0.20
n = 5,576 sessions

19.0%

Density >0.20–0.40
n = 688 sessions

12.5%

Density >0.40–1.00
n = 829 sessions

Restricted cubic spline with controls; shaded band: player-clustered 95% CI.

Observed bin rates are unadjusted. The smooth curve does not establish a unique breakpoint.
